Designed to be a concise and easy-to-read reference manual that comprehensively covers the basics of every step of modern cataract surgery from preoperative evaluation to postoperative care. Detailed instructions and pearls are provided for each specific step. Each chapter contains a summary box which highlights the key points from each topic discussed. Additionally, images, diagrams, photographs, and tables are included to enhance understanding of specific topics.

It was the most brutal corporate restructuring in Wall Street history. The 2015 bankruptcy brawl for the storied casino giant, Caesars Entertainment, pitted brilliant and ruthless private equity legends against the world's most relentless hedge fund wizards. In the tradition of Barbarians at the Gate and The Big Short comes the riveting, multi-dimensional poker game between private equity firms and distressed debt hedge funds that played out from the Vegas Strip to Manhattan boardrooms to Chicago courthouses and even, for a moment, the halls of the United States Congress. On one side: Apollo Global Management and TPG Capital. On the other: the likes of Elliott Management, Oaktree Capital, and Appaloosa Management. The Caesars bankruptcy put a twist on the old-fashioned casino heist. Through a $27 billion leveraged buyout and a dizzying string of financial engineering transactions, Apollo and TPG—in the midst of the post-Great Recession slump—had seemingly snatched every prime asset of the company from creditors, with the notable exception of Caesars Palace. But Caesars ' hedge fund lenders and bondholders had scooped up the company ' s paper for nickels and dimes. And with their own armies of lawyers and bankers, they were ready to do everything necessary to take back what they believed was theirs—if they could just stop their own infighting. These modern financiers now dominate the scene in Corporate America as their fight-to-the-death mentality continues to shock workers, politicians, and broader society—and even each other. In The Caesars Palace Coup, financial journalists Max Frumes and Sujeet Indap illuminate the brutal tactics of distressed debt mavens—vultures, as they are condemned—in the sale and purchase of even the biggest companies in the world with billions of dollars hanging in the balance.

In this stunning true crime thriller of Facebook, catfishing, and jealousy, a double-murder begins with the click of a button. When Bill Payne and Billie Jean Hayworth began their romance, they unknowingly set in motion a diabolical plot that would end with them murdered in their own home, Hayworth holding their mercifully unharmed infant. Chris was a CIA agent who was concerned about Jenelle. Seeing the cyberbullying she had endured, and worried for her safety, Chris got in touch with Jenelle ' s protective parents, and her devoted boyfriend, warning them that Payne and Hayworth were a danger to Jenelle. He got especially close with Jenelle ' s mother, Barbara, who thought of Chris like a son, though she had never met him. Chris claimed that surveillance of Payne and Hayworth revealed that the two of them were planning on harming Jenelle, that it was imminent, and that something needed to be done immediately. Chris promised that he would have their back if they were to act to protect Jenelle. And so they did. Jenelle ' s father, Buddy, and her boyfriend, Jamie, broke into the home of Payne and Hayworth and murdered them in their own home. What the police investigation turned up, though, made this crime all the more terrifying. Jenelle had been Chris the entire time, catfishing her family and her boyfriend to act in vengeance on her behalf. Using forensic linguistics and diving through the brambles that Jenelle laid to cover her tracks, police were able to put together a chilling portrait of a sociopath, made all the more ruthless by the anonymity of her online life. Bizarre and unforgettable, Dennis Brooks examines the crime and trial from all angles, bringing his expertise as the lead prosecutor in the strange and disturbing case.

An all-star lineup of rock-n-rollers—from Jane ' s Addiction ' s Perry Farrell to Suzi Quatro and Verdine White of Earth, Wind & Fire—relay the uproariously wild, sentimental, and unexpected pre-stardom stories behind their favorite records. Rock Stars on the Record is a collection of first-hand tales by artists of all ages, backgrounds, and musical influences, remembering the meaning behind the records that mattered most to them. From Laura Jane Grace to Ian MacKaye, Don McLean to Cherie Currie, Alice Bag to Mac DeMarco, and many more, bestselling author Eric Spitznagel talks to rock stars across the sonic spectrum about the albums that changed them in ways only music can change someone. Everyone ' s most cherished childhood record—be it a battered piece of vinyl, torn cassette tape, or scratched CD—has a story, and those stories can be more revealing about their owners than you might expect. Read about how " Weird Al " Yankovic refined his accordion skills by playing along to Elton John ' s Goodbye Yellow Brick Road, or how Fishbone ' s Angelo Moore saved his life with a boombox and a Bad Brains album. Or about how Wendy Melvoin and Lisa Coleman of Prince ' s longtime band, The Revolution, fell in love while trading mixtapes. Each profile is more emotional, fascinating, and hilarious than the last. So place that needle in the groove, and prepare to hear something revelatory from your favorite rockers past and present.

What if Kennedy survived Dallas? President John F. Kennedy has lived through the ambush in Dealey Plaza. America holds its collective breath, seeing its president nearly executed in broad daylight. But as the country marches on, the office of the President finds itself under a much more insidious type of fire. Political scandal, an endless war, and a country coming apart at the seams take the 1960 ' s in a terrifying new direction, and both John and his attorney-general brother, Bobby, struggle to stay ahead of their enemies, political and otherwise, and steer America toward a greater future. Bryce Zabel is a master of the cover-up and the conspiracy, creating the Emmy-award winning series DARK SKIES. SURROUNDED BY ENEMIES is the first novel in the new Breakpoint series—each book exploring seminal moments in popular history and taking readers on a journey into a mirror world where events are both unexpected yet startlingly believable. This savvy, fiercely intelligent novel, perfect for readers of Harry Turtledove, brings together elements of political thriller and page-turning history, enthralling readers with a sharply written take on the America that was, and the America that could have been. WINNER OF THE 2013 SIDEWISE AWARD FOR ALTERNATE HISTORY "I have some experience with shattered timelines and altered realities but this one kept me guessing every page. " —Damon Lindelof, writer/producer of LOST, STAR TREK INTO DARKNESS " Plausible development, building from what we know about what really did go on, and a whacking good story...SURROUNDED BY ENEMIES delivers on both, big-time. So hold on to your hats, folks. You ' re in for quite a ride. " —Harry Turtledove, alternative history author, HOW FEW REMAIN

The incredible true story of Tiger Woods ' s dramatic comeback following his humbling and very public personal, physical, and professional setbacks. One publicly imploded marriage. Two car accidents. Eight surgeries. And now, a miracle of hard work and storied talent: five Masters wins. Once hailed as " the greatest closer in history " before he fell further than any beloved athlete in America ' s memory, Tiger swung at the world ' s wildest expectations and beat the skeptics with his April 2019 Masters championship. Roaring Back traces his road to Augusta and the improbable, phenomenal comeback of one of the greatest golfers in history. New York Times–bestselling author Curt Sampson details the highs and lows of Woods ' s career in three gripping acts. From his startling loss at the 2009 PGA Championship, detrimental obsession with his swing, and that infamous night involving an ex-wife and a nine-iron…to adoring fans and lucrative sponsors turning their backs, exclusive interviews with past instructors and PGA tour peers, and an arrest complete with a toxicology report . . . finally to Tiger coming from behind for his fifth green jacket as the crowd rumbled in Georgia, and how his comeback rivals those of the most dramatic in his sport. Sampson also places Woods ' s defeats and triumphs in the context of historic comebacks by other notable golfers like Ben Hogan, Skip Alexander, Aaron Silton, and Charlie Beljan, finding the forty-three-year-old alone on the green for his trajectory of victory against all odds. As this enthralling book reveals, Tiger never doubted the perseverance of the winner in the mirror. " Sampson admirably details all the highs and lows. " —Jim Nantz, CBS Sports

Celebrated sports writer Roger Kahn casts his gaze on the golden age of baseball, an unforgettable time when the game thrived as America's unrivaled national sport. THE ERA begins in 1947, with Jackie Robinson changing major league baseball forever by taking the field for the Dodgers. Dazzling, momentous events characterize the decade that followed—Robinson's amazing accomplishments; the explosion on the national scene of such soon-to-be legends as Mickey Mantle, Willie Mays, Bobby Thomson, Duke Snider, and Yogi Berra; Casey Stengel's crafty managing; the emergence of televised games; and the stunning success of the Yankees as they play in nine out of eleven World Series. THE ERA concludes with the relocation of the Dodgers from Brooklyn to Los Angeles, a move that shook the sport to its very roots. Praise for Roger Kahn: "As a kid, I loved sports first and writing second, and loved everything Roger Kahn wrote. As an adult, I love writing first and sports second, and love Roger Kahn even more." —Pulitzer Prize winner, David Maraniss "He can epitomize a player with a single swing of the pen." —TIME magazine "Roger Kahn is the best baseball writer in the business." —Stephen Jay Gould, New York Review of Books "Kahn has the almost unfair gift of easy, graceful writing." —BOSTON HERALD

Spanning the nineteenth and twentieth centuries, this fascinating history explores the lives and achievements of great women in science across the globe. Ten Women Who Changed Science and the World tells the stories of trailblazing women who made a historic impact on physics, biology, chemistry, astronomy, and medicine. Included in this volume are famous figures, such as two-time Nobel Prize winner Marie Curie, as well as individuals whose names will be new to many, though their breakthroughs were no less remarkable. These women overcame significant obstacles, discrimination, and personal tragedies in their pursuit of scientific advancement. They persevered in their research, whether creating life-saving drugs or expanding our knowledge of the cosmos. By daring to ask ' How? ' and ' Why? ' , each of these women made a positive impact on the world we live in today. In this book, you will learn about: Astronomy Henrietta Leavitt (United States, 1868–1921) discovered the period-luminosity relationship for Cepheid variable stars, which enabled us to measure the size of our galaxy and the universe. Physics Lise Meitner (Austria, 1878–1968) fled Nazi Germany in 1938, taking with her the experimental results which showed that she and Otto Hahn had split the nucleus and discovered nuclear fission. Chien-Shiung Wu (United States, 1912–1997) demonstrated that the widely accepted ' law of parity ' , which stated that left-spinning and right-spinning subatomic particles would behave identically, was wrong. Chemistry Marie Curie (France, 1867–1934) became the only person in history to have won Nobel prizes in two different fields of science. Dorothy Crowfoot Hodgkin (United Kingdom, 1910–1994) won the Nobel Prize for Chemistry in 1964 and pioneered the X-ray study of large molecules of biochemical importance. Medicine Virginia Apgar (United States, 1909–1974) invented the Apgar score, used to quickly assess the health of newborn babies. Gertrude Elion (United States, 1918–1999) won the Nobel Prize for Physiology or Medicine in 1988 for her advances in drug development. Biology Rita Levi-Montalcini (Italy, 1909–2012) won the Nobel Prize for Physiology or Medicine in 1986 for her co-discovery in 1954 of Nerve Growth Factor (NGF). Elsie Widdowson (United Kingdom, 1906–2000) pioneered the science of nutrition and helped devise the World War II food-rationing program. Rachel Carson (United States, 1907–1964) forged the environmental movement, most famously with her influential book Silent Spring.
