Science Graphs and Charts Worksheets

Making Science Graphs and Interpreting Data Scientific Graphs:

Most scientific graphs are made as line graphs. There may be times when other types would be appropriate, but they are rare. The lines on scientific graphs are usually drawn either straight or curved.

These "smoothed" lines do not have to touch all the data points, but they should at least get close to most of them.

Remember to check and interpret the relationship between the x and y-axis and the key if one is provided. Take good notes re-interpreting the graph and highlighting trends.

Types of Graphs to Know for the Science Section of the ACT ...

Answer: (a) OA is a straight line graph between speed and time, and it is sloping upward from O to A. Therefore, the graph line OA represents uniform acceleration. (b) AB is a straight line graph between speed and time, which is parallel to the time axis (x-axis). So, AB represents uniform speed. There is no acceleration from A to B.
