The scope of the conference will cover the following 1 Power system planning & operation 2 Electrical machines & drives 3 Power electronics applications 4 High voltage engineering 5 Power system protection & security 6 Power system control and stability 7 Smart grids and micro grids 8 HVDC & FACTS 9 Nuclear power plants 10 Development of transmission and distribution systems 11 Renewable energy systems and grid integration 12 Energy efficiency and management 13 Application of AI in power systems 14 Power quality 15 Power system asset management 16 Development of power system education programs

We are entering the era of digital transformation where human and artificial intelligence (AI) work hand in hand to achieve data driven performance. Today, more than ever, businesses are expected to possess the talent, tools, processes, and capabilities to enable their organizations to implement and utilize continuous analysis of past business performance and events to gain forward-looking insight to drive business decisions and actions. AI-Enabled Analytics in Business is your Roadmap to meet this essential business capability. To ensure we can plan for the future vs react to the future when it arrives, we need to develop and deploy a toolbox of tools, techniques, and effective processes to reveal forward-looking unbiased insights that help us understand significant patterns, relationships, and trends. This book promotes clarity to enable you to make better decisions from insights about the future. Learn how advanced analytics ensures that your people have the right information at the right time to gain critical insights and performance opportunities Empower better, smarter decision making by implementing AI-enabled analytics decision support tools Uncover patterns and insights in data, and discover facts about your business that will unlock greater performance Gain inspiration from practical examples and use cases showing how to move your business toward AI-Enabled decision making AI-Enabled Analytics in Business is a must-have practical resource for directors, officers, and executives across various

functional disciplines who seek increased business performance and valuation.

Introduction to chemical communication and pheromones.

New data continually indicate that antioxidants may contribute to reductions in cancer risks and that chronic consumption of low levels of chemical carcinogens in our diet may contribute to an increased risk of developing specific types of cancers. Research also shows that in America today, the leading causes of death are cancer and heart disease. Considering that diet plays a significant role in the development of both of these diseases, issues of food toxicology become particularly topical.

This volume comprises the proceedings of a symposium on marine mammal survey assessment methods, which took place in Seattle, Washington, USA.

A Fast Company best book of the year  
A Washington Post bestseller  
Winner of the 2017 Axiom Business Book Award in Business Technology  
How do you tell a real trend from the merely trendy? How, for example, will a technology--like artificial intelligence, machine learning, self-driving cars, biohacking, bots, and the Internet of Things--affect us, our businesses, and workplaces? How will it eventually change the way we live, work, play, and think--and how should we prepare for it now? In *The Signals Are Talking*, noted futurist Amy Webb shows us how to analyze the "true signals"--those patterns that will coalesce into a trend with the potential to change everything--and land on the right side of disruption. The future, Webb shows, isn't something that happens to us passively. Using a proven, tested methodology, she enables us to see ahead and forecast what's to come--challenging us to create our own preferred futures.
