*AP Psychology - Chapter 9 - Memory - Quizlet*

Chapter Summary. The Phenomenon of Memory. Information Processing. Memory is the persistence of learning over time. Psychologists have proposed several information-processing models of memory. We will use the influential three-stage processing model, which suggests that we (1) register fleeting sensory memories, some of which are (2) processed into on-screen short-term or working memories, a tiny fraction of which are (3) encoded for long-term memory and, possibly, later retrieval.
