Basic Radio And Television By Sp Sharma | hsm1.signority  
An antenna (aerial) on your roof picks up radio waves from the transmitter. With satellite TV, the signals come from a satellite dish mounted on your wall or roof. With cable TV, the signal comes to you via an underground fiber-optic cable. The incoming signal feeds into the antenna socket on the back of the TV.

How does television (TV) work? - Explain that Stuff

The transmitter takes some sort of message (it could be the sound of someone's voice, pictures for a TV set, data for a radio modem or whatever), encodes it onto a sine wave and transmits it with radio waves. The receiver receives the radio waves and decodes the message from the sine wave it receives. ... this is the basic principle behind any ...

How Radio Works | HowStuffWorks

Television is now delivered in a variety of ways: □over the air□ by terrestrial radio waves (traditional broadcast TV); along coaxial cables (cable TV); reflected off of satellites held in geostationary Earth orbit (direct broadcast satellite, or DBS, TV); streamed through the Internet; and recorded optically on digital video discs (DVDs) and Blu-ray discs.
