This book covers both the artistry and craftsmanship of cinematography and visual storytelling. Few art forms are as tied to their tools and technology as is cinematography. Take your mastery of these new tools, techniques, and roles to the next level with this cutting-edge roadmap from author and filmmaker Blain Brown. This 4th edition has been thoroughly updated throughout to include detailed information on the latest lighting and camera equipment, as well as expanded and updated discussion on the following areas: shooting on a budget, color spaces with emphasis on the new UHD standards, the decision-making process in choosing what lights and equipment to use, considerations concerning power issues, safety and what electrical supply is needed for various types of lights, an examination of the cinematographer's role in preproduction, and much more. Topics Include: - Visual storytelling - Continuity and coverage - Cameras and digital sensors - The tools and basics of film lighting - Methods of shooting a scene - Continuity and coverage - Exposure - Color - Understanding digital images - Using linear, gamma, and log video - Image control and grading on the set - Data management and the DIT - Optics and focus - Camera movement - Set operations - Green screen, high speed, and other topics. Whether you are a student of filmmaking, someone just breaking into the business, working in the field and looking to move up the ladder, or an experienced filmmaker updating your knowledge of tools and techniques, this book provides both the artistic background of visual language and also the craft of shooting for continuity, lighting tools and methods, and the technical side of capturing images on digital or on film. The companion website (www.routledge.com/cw/brown) features additional material, including lighting demonstrations, basic methods of lighting, methods of shooting a scene, using diffusion, and other topics.

The world of cinematography has changed more in the last few years than it has since it has in 1929, when sound recording was introduced. New technology, new tools and new methods have revolutionized the art and craft of telling stories visually. While some aspects of visual language, lighting and color are eternal, shooting methods, workflow and cameras have changed radically. Even experienced film artists have a need to update and review new methods and equipment. These change affect not only the director of photography but also the director, the camera assistants, gaffers, and digital imaging technicians. Cinematography: Theory and Practice covers both the artistry and craftsmanship of cinematography and visual storytelling. Few art forms are as tied to their tools and technology as is cinematography. Take your mastery of these new tools, techniques, and roles to the next level with this cutting-edge roadmap from author and filmmaker Blain Brown. Whether you are a student of filmmaking, just breaking into the industry and looking to move up to the next level, or an experienced professional who wants to update their knowledge of tools and techniques, this book provides both a basic introduction to these issues as well as more advanced and in-depth coverage of the subject. The companion website features additional material, including lighting demonstrations, basic methods of lighting, using diffusion and other topics. Topics Include: Visual language Visual storytelling Continuity and coverage Cameras and digital sensors Exposure techniques for film and video Color in-depth Understanding digital images Waveform monitors, vectorscopes, and test charts Using linear, gamma, and log encoded video Image control and grading on the set The tools and basics of film lighting ASC-CDL, ACES and other new methods Optics and focus Camera movement Set operations Green screen, high speed and other topics

The Basics of Filmmaking is an introductory textbook tailored to the needs of beginning and intermediate film students and independent filmmakers that expertly guides you through the entirety of the craft, from screenwriting all the way through to editing, with detailed chapters covering each department involved in the filmmaking process. The book takes a behind-the-scenes look at every aspect of the filmmaking process: writing the screenplay (and getting it critiqued by a professional), pre-production, cinematography, lighting, the shooting process, getting good audio, editing, and even going to a pitch meeting to sell it. It addresses the real fundamentals, the mechanics and the basic concepts of how to write, produce, direct, shoot, record, and edit your movie. Written by Blain Brown, a seasoned expert who has worked professionally as a cinematographer, screenwriter, director, producer, line producer, assistant director, gaffer, grip, and editor; this is a must have resource for any filmmaking student. Featuring an accompanying companion website with video examples of scene directing methods, continuity and coverage, working with the camera, lighting, audio, and editing, and downloadable production forms you can fill out and use for your projects.

Motion Picture and Video Lighting, Second Edition, is your indispensable guide to film and video lighting. Written by the author of the industry bible Cinematography, this book explores technical, aesthetic, and practical aspects of lighting for film and video. It will show you not only how to light, but why. Written by a professional in the field, this comprehensive book explores light and color theory; equipment; and techniques to make every scene look its best. Now in full color, Motion Picture and Video Lighting is heavily illustrated with photos and diagrams throughout. This new edition also includes the ultimate 'behind the scenes' DVD that takes you directly on a professional shoot and demonstrates technical procedures and equipment. In addition, 20 video clips include: lighting demonstrations, technical tests, fundamentals of lighting demos, and short scenes illustrating different styles of lighting.

Lavishly produced and illustrated, Cinematography covers the entire range of the profession. The book is not just a comprehensive guide to current professional practice; it goes beyond to explain the theory behind the practice, so you understand how the rules came about and when it's appropriate to break them. In addition, directors will benefit from the book's focus on the body of knowledge they should share with their Director of Photography. Cinematography presents the basics and beyond, employing clear explanations of standard practice together with substantial illustrations and diagrams to reveal the real world of film production. Recognizing that professionals know when to break the rules and when to abide by them, this book discusses many examples of fresh ideas and experiments in cinematography. Covering the most up-to-date information on the film/digital interface, new formats, the latest cranes and camera support and other equipment, it also illustrates the older tried and true methods.

It's a whole new world for cinematographers, camera assistants, and postproduction artists. New equipment, new methods, and new technologies have to be learned and mastered. New roles such as that of the DIT (Digital Imaging Technician), Digital Loader, and Data Manager are integral to today's motion picture production process. Take your mastery of these new tools, techniques, and roles to the next level with this cutting-edge roadmap from esteemed author and filmmaker Blain Brown. The Filmmaker's Guide to Digital Imaging covers both the theory and the practice, featuring full-color, in-depth coverage of essential terminology, technology, and industry-standard best-practices. Brown covers new industry-wide production standards such as ASC-CDL and the ACES workflow. Interviews with professional cinematographers and DITs working on Hollywood productions equip you with knowledge that is essential if you want to work in today's motion picture industry, whether as a cinematographer, DIT, Digital Loader, Data Manager, camera assistant, editor, or VFX artist. Topics include: Digital sensors and cameras The structure of digital images Waveform monitors, vectorscopes, and test charts Using linear, gamma, and log encoded video files Exposure techniques for HD and UltraHD Understanding digital color Codecs and file formats The DIT cart Downloading, ingesting, and managing video files Workflow from camera to DIT cart to post Using metadata and timecode The companion website (www.focalpress.com/cw/brown) features additional material, including demonstrations and interviews with experienced DITs and cinematographers.

We can't shoot good pictures without good lighting, no matter how good the newest cameras are. Shooting under available light gives exposure, but lacks depth, contrast, contour, atmosphere and often separation. The story could be the greatest in the world, but if the lighting is poor viewers will assume it's amateurish and not take it seriously. Feature films and TV shows, commercials and industrial videos, reality TV and documentaries, even event and wedding videos tell stories. Good lighting can make them look real, while real lighting often makes them look fake. Lighting for Cinematography, the first volume in the new CineTech Guides to the Film Crafts series, is the indispensable guide for film and video lighting. Written by veteran gaffer and cinematographer David Landau, the book helps the reader create lighting that supports the emotional moment of the scene, contributes to the atmosphere of the story and augments an artistic style. Structured to mimic a 14 week semester, the chapters cover such things as lighting for movement, working with windows, night lighting, lighting the three plains of action and non-fiction lighting. Every chapter includes stills, lighting diagrams and key advice from professionals in the field, as well as lighting exercises to help the reader put into practice what was covered. www.lightingforcinematography.com

Introduction to Cinematography offers a practical, stage-by-stage guide to the creative and technical foundations of cinematography. Building from a skills-based approach focused on professional practice, cinematographer and author Tania Hoser provides a step-by-step introduction for both cinematographers and camera assistants to the techniques, processes, and procedures of working with cameras, lenses, and light. She provides hands-on insight into negotiating with production constraints and understanding the essentials of the image workflow from shot to distribution, on projects of any scope and budget. Richly illustrated, the book incorporates exercises and sample scripts throughout, exploring light, color, movement, 'blocking', and pacing scenes. The principles and techniques of shaping and controlling light are applied to working with natural light, film lamps, and, as with all areas of cinematography, to low budget alternatives. This makes Introduction to Cinematography the perfect newcomer's guide to learning the skills of cinematography that enables seamless progression from exercises through to full feature shoots. Assessment rubrics provide a framework to measure progress as the reader's ability to visually interpret scripts and enhance the director's vision develops. The book also teaches readers: To understand and develop the combination of skills and creativity involved in cinematography; Photographic principles and how they are applied to control focus exposure, motion blur, and image sharpness; To identify the roles and skills of each member of the camera department, and how and when each are required during a shoot; The order and process of lighting on all scales of productions and the use and application of the four main types of lamps; How to use waveforms, false color, and zebras for monitoring light levels, and meters for guiding exposure choices; The principles of the color wheel, color palettes, and the psychological effects of color choices; How to shoot for different types of fiction and nonfiction/documentary films and how to apply these skills to other genres of TV and film production; Strategies for both starting and progressing your career within cinematography and the camera department. **Winner of 'Best new Textbook in Humanities and Media Arts' in the Taylor and Francis Editorial Awards 2018**

* Comprehensive, up-to-date information vital to all crew members * Over 150 easy-to-use tables allow immediate, in-the-field access to such information as depth of field, exposure, filter factors, and international conversion factors * Small size allows the use to carry it in pocket or tool-box. The Filmmaker's Pocket Reference provides all members of the crew with comprehensive, up-to-date information vital to the smooth production of motion pictures and videos. Over 150 easy-to-use tables allow immediate, in-the-field access to such information as depth-of-field, exposure, safe working loads for chains, and international conversion charts. In addition, general information tables ranging from time zones to car rentals are included. The text provides inside information on production, and includes such things as special effects, panning techniques and understanding filters. Everyone on the set, including the production crew and production managers, will find this little book an invaluable tool.

Professional Cinematography for Directors helps directors and cinematographers interact knowledgeably and effectively. While covering all aspects of cinematography, this book focuses primarily on those elements of the craft that the director needs to know, such as camera movement, frame and lens selection, the language of lighting, and other aspects of a film's "look" that require creative decision making on the part of the director. It is up to the cinematographer to understand and execute these ideas. Professional Cinematography for Directors treats the technical aspects of cinematography within the context of achieving particular aesthetic creative goals. Professional Cinematography for Directors presents the basics and beyond, employing clear explanations of standard practice together with substantial illustrations, diagrams and anecdotes to reveal the real world of film production. It includes interviews with prominent directors, cinematographers and film teachers to supplement the text, along with photographs which show how they actually do their job and run the set. The professional knows when to break the rules, and this book discusses many examples of fresh ideas and experiments in cinematography. It discusses the latest information on the film/digital interface, new formats, the latest cranes and camera support and other equipment, never ignoring the older tried and true methods. Professional Cinematography for Directors is illustrated with exam
