United States Coast Guard Marine Safety Manual Volume IV - Technical COMDTINST M16000.9

The Coast Guard knows how to navigate (even if the Navy doesn't!). This official guide to Coast Guard navigation procedures is an excellent resource for anyone who is responsible for safe navigation at sea. As the Manual observes: Navigation is a critical and fundamental competency for all underway operations. This Manual assists CO/OICs and Navigators in carrying out their responsibilities outlined in Reference (a), and complements References (b) through (l). It also provides uniform standards and guidance to ensure the navigational accuracy and safety of Coast Guard cutters, boats, and their crews during operations. This Manual leverages the capabilities provided by electronic navigation systems found on cutters, cutter boats, and boats while retaining the capability to conduct traditional forms of navigation if, and when, electronic means of navigation are not available. Analysis of operational mishaps and studies have shown that risks associated with navigation can be systematically controlled by: (1) Strong knowledge and skills in navigation fundamentals, doctrine, and techniques. (2) Preventing accumulation of errors in the flow of information. (3) Verifying vessel position using all available means. (4) Strong knowledge regarding the structure, capabilities, and limitations of electronic charting and Global Positioning System (GPS) data. (5) Compliance with established navigational procedures. COAST GUARD MEDICAL MANUAL COMDTINST M6000.1F CH-2 JUNE 2018 Volume II This Commandant Change Notice publishes revisions to the Coast Guard Medical Manual, COMDTINST M6000.1F. This Notice is applicable to all active duty and reserve Coast Guard members and the other Services Members assigned to duty with the Coast Guard. This book is over 700 pages so we split it into two (2) Volumes. This is Volume 2. It contains Chapters 8 thru Chapter 14. Why buy a book you can download for free? We print the paperback book so you don't have to. First you gotta find a good clean (legible) copy and make sure it's the latest version (not always easy). Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the bound paperback from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these paperbacks as a service so you don't have to. The books are compact, tightly-bound paperback, full-size (8 1/2 by 11 inches), with large text and glossy covers. 4th Watch Publishing Co. is a HUBZONE SDVOSB. https://usgovpub.com
