Because police are the most visible face of government power for most citizens, they are expected to deal effectively with crime and disorder and to be impartial. Producing justice through the fair, and restrained use of their authority. The standards by which the public judges police success have become more exacting and challenging. *Fairness and Effectiveness in Policing* explores police work in the new century. It replaces myths with research findings and provides recommendations for updated policy and practices to guide it. The book provides answers to the most basic questions: What do police do? It reviews how police work is organized, explores the expanding responsibilities of police, examines the increasing diversity among police employees, and discusses the complex interactions between officers and citizens. It also addresses such topics as community policing, use of force, racial profiling, and evaluates the success of common police techniques, such as focusing on crime "hot spots." It goes on to look at the issue of legitimacy "how the public gets information about police work, and how police are viewed by different groups, and how police can gain community trust. *Fairness and Effectiveness in Policing* will be important to anyone concerned about police work: policy makers, administrators, educators, police supervisors and officers, journalists, and interested citizens.

There has been an exponential increase in desalination capacity both globally and nationally since 1960, fueled in part by growing concern for local water scarcity and made possible to a great extent by a major federal investment for desalination research and development. Traditional sources of supply are increasingly expensive, unavailable, or controversial, but desalination technology offers the potential to substantially reduce water scarcity by converting the almost inexhaustible supply of seawater and the apparently vast quantities of brackish groundwater into new sources of freshwater. *Desalination* assesses the state of the art in relevant desalination technologies, and factors such as cost and implementation challenges. It also describes reasonable long-term goals for advancing desalination technology, posits recommendations for action and research, estimates the funding necessary to support the proposed research agenda, and identifies appropriate roles for governmental and nongovernmental entities.

Hate your job? Ready to quit? Facing a layoff before you even have a chance to quit? Is your boss is a flaming jerk? Think you might have a lawsuit? If any of these scenarios apply to you, you are facing a crucial career moment. Mistakes and misinformation will cost you dearly. In *Stand Up For Yourself Without Getting Fired*, celebrated attorney Donna Ballman provides winning answers to these and many more tough questions, such as: I think they 're getting ready to lay me off. What can I do? My boss is creating a hostile environment. Can I sue? What does it mean if I sign a paper saying I 'm an independent contractor and not an employee? Am I exempt from overtime? Whether you 're a recent college grad or an almost-retiree, newly employed or laid off after 20 years; gay or married with kids; janitor or CEO...*Stand Up For Yourself Without Getting Fired* will give you the specific and relevant advice you need to face any career-threatening situation...and come out ahead. Of course, you could just say, "Screw you guys. I 'm going home!"
