Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

Corporate Finance, by Ross, Westerfield, and Jaffe emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. The ninth edition has been fully updated to reflect the recent financial crisis and is now accompanied by Connect, an exciting new homework management system.

Provides students with an inexpensive note-taking system that contains a reduced copy of every slide in the PowerPoint presentation.

"Aswath Damodaran is simply the best valuation teacher around. If you are interested in the theory or practice of valuation, you should have Damodaran on Valuation on your bookshelf. You can bet that I do." -- Michael J. Mauboussin, Chief Investment Strategist, Legg Mason Capital Management and author of More Than You Know: Finding Financial Wisdom in Unconventional Places In order to be a successful CEO, corporate strategist, or analyst, understanding the valuation process is a necessity. The second edition of Damodaran on Valuation stands out as the most reliable book for answering many of today's critical valuation questions. Completely revised and updated, this edition is the ideal book on valuation for CEOs and corporate strategists. You'll gain an understanding of the vitality of today's valuation models and develop the acumen needed for the most complex and subtle valuation scenarios you will face.

Proven, practical techniques for estimating the cost of capital "I would recommend Cost of Capital and the companion Cost of Capital Workbook as excellent tools for passing the various professional exams that lead to valuation accreditations and designations." -James R. Hitchner, Phillips Hitchner Group, Inc., Atlanta, Georgia "As a discussion leader for the AICPA ABV exam review course, this set of questions is perfect for people to use for practice for that exam and others (ASA and NACVA from my experience), for that matter. The mix of formats, including exercises, is great." -Ronald L. Seigneur, Seigneur & Company, PC, CPAs, Lakewood, Colorado "The exercises are particularly good." -Stephen J. Bravo, Apogee Business Valuations, Framingham, Massachusetts Cost of capital estimation has long been recognized as one of the most critical elements in business valuation, capital budgeting, feasibility studies, and corporate finance decisions-it is also, however, one of the most difficult procedures to perform and assess. The Cost of Capital Workbook will help financial officers of small, midsize, and even multibillion dollar companies estimate required rates of return and tackle the myriad issues associated with cost of capital. It will also help

business valuation professionals of all levels to gain a greater understanding of cost of capital concepts and procedures. Using hands-on exercises designed to implement procedures described in Cost of Capital, Second Edition, the Cost of Capital Workbook provides a deeper understanding of cost of capital problems by offering a practical experience in applying solutions. The Workbook includes multiple choice, true or false, and fill-in-the-blank questions as well as:

- * Exercises estimating cost of capital by the build-up model and the Capital Asset Pricing Model
- * Exercises using Ibbotson Associates' Stocks, Bonds, Bills, and Inflation Valuation Edition Yearbook
- * Applications using discounted cash flow (DCF) methods, based on forecasted earnings and cash flows
- * Examples covering valuing a business by both equity and invested capital procedures, making project selections, and utility-rate determinations
- * Numerous exercises using Ibbotson data from the Cost of Capital Workbook

Business appraisers, corporate finance officers, CPAs, and attorneys will find the Cost of Capital Workbook an indispensable guide to the effective estimation and application of cost of capital.
