DBQ- Industrial Revolution. The Industrial Revolution began in England in the late 1700. It had a wide range of negative and positive effects in which it affected the economic and social life on the people living in England. These outcomes have been interpreted by different views of people such as factory owners, the government, factory workers, and others who viewed the conditions of the industrial cities at the time.

The impact of the Industrial Revolution was a positive experience for some, but for others it was a time of great difficulty. Consequently, demands for reform and protection for workers arose. Governments and unions began to take action. Others advocated the overthrow of the capitalist system because of its inherent evils. They suggested socialism.

The Industrial Revolution was a time of drastic change, for both the better and worse. Changes like factories, steam power, and more people flocking to the city generally improved life. However, these changes also meant that working conditions declined, and massive increases in pollution and disease.
