The opisthokont eukaryotes include nucleariids (protists), fungi, choanoflagellates (protists) and animals. Nucleariids are the most closely related organisms to the fungi kingdom. They are single-celled organisms that feed on algae and bacteria. Choanoflagellates are the closest relatives of animals.

Asexual reproduction is a type of reproduction that does not involve the fusion of gametes or change in the number of chromosomes. The offspring that arise by asexual reproduction, are either from a single cell or from a multicellular organism, it inherits the genes of their single parent. Asexual reproduction is the primary form of reproduction for single-celled organisms such as archaea and ...
