Tried and tested by generations of students, Street on Torts can be trusted to provide a clear and accurate explanation of tort law. In this edition, John Murphy has thoroughly rewritten the book to bring a fresh and readable style to this classic text. Students new to tort law can read treet chapter by chapter as they work through their lectures: the book has been substantially restructured to map closely to a typical undergraduate law course and provides all the essential material in one volume. Street’s broad coverage has been maintained to ensure it appeals to a wide range of institutions as a main course text. This edition provides a strong analysis of case law, explaining how torts actually work and examining the social purposes behind them. The importance of the Human Rights Act is traced throughout the book, and a new chapter has been included on the misuse of private information to reflect this rapidly developing area of the law. Further reading sections have been added to the end of each chapter. Online Resource Centre The twelfth edition of Street on Torts is accompanied by an Online Resource Centre providing twice-yearly updates, giving students easy access to key developments in the law.

The anthology explores the interrelationship between migration and a supposedly existent crisis of the modern nation state. The argument of such a crisis is mainly used by the New Right to stimulate nationalist feelings and provoke hate and aggression. We, in contrast to this perception, argue that from a historical and current perspective, migration is not endangering the nation state, but rather changing the idea of a nation itself by redefining it. In historical as well as current case studies, the authors determine the political dangers of right wing demagogues, while emphasizing the chances, immigration is offering the progress of the nation state. While it will be discussed how nationalism is impacting on the perception of migration, we also want to emphasize how it is perceived by the people in the specific regions, which are either confronted with migration or those which are not. The authors for the volume come from different fields, namely history and political sciences, and are consequently able to offer the reader a broad insight into the historical roots and the current consequences nationalism had or has on the perception and the local as well as global policies towards migration. The analysis of particular immigrant groups (e.g. North Koreans in post-war Korea, South Asians in the Emirates, Middle Eastern refugees in Europe, Hispanics in the United States) as well as a close reading of crisis related media (newspapers and other media in Europe and the US) will, all in all, establish a broad perspective, due to which the reader will be able to compare and connect the national events to a larger global picture.
