In order to retrieve these fields from MARS, three MARS command lines have to be added: method=1, system=2, and origin=ecmf but may change, if the monthly forecasting system is modified. Look at the System Change Notice to see which system value is valid. For the control forecast TYPE=CF, for perturbed forecasts TYPE=PC.

The ECMWF Forecast User Guide helps forecasters and other meteorologists to make the best use of the forecast products from ECMWF. The user guide provides all the tools needed for correct interpretation of ECMWF products, enabling users to deliver a high-quality service to their own customers. It also encourages users to employ new or previously overlooked forecast techniques. The guide focuses on the medium range but also covers the increasingly important monthly and seasonal output.

Professor Tor Bergeron, personal communication, 1974. The aim of this User Guide is to help meteorologists make the best use of the forecast products from ECMWF - to increase understanding of the ensemble forecast process, to develop new products, to reach new sectors of society, to satisfy new demands. The User Guide presents the Integrated Forecasting System (IFS) and advises on how best to use the output, not least on how to build up trust in the forecast information.

*Forecast User Guide - Forecast User Guide - ECMWF ...*  
The changes also mean a move to an open data policy for historical information in ECMWF's huge data repository - the Meteorological Archival and Retrieval System, or MARS. MARS contains hundreds of petabytes of data including recent and past forecasts, analyses, climatological data and research experiments; it represents the largest archive of such data in the world.
