GNU Emacs Lisp Reference Manual: [Advising Functions](#) : 17. [Advising Emacs Lisp Functions](#) . The advice feature lets you add to the existing definition of a function, by advising the function. This is a clean method for a library to customize functions defined by other parts of Emacs--cleaner than redefining the whole function.

~~GNU Emacs Lisp Reference Manual: Advising Functions~~

GNU Emacs Lisp Reference Manual: [Deleting Processes](#) [<<] [>>] 37.5 [Deleting Processes](#) . Deleting a process disconnects Emacs immediately from the subprocess, and removes it from the list of active processes. It sends a signal to the subprocess to make the subprocess terminate, but this is not guaranteed to happen immediately.

~~GNU Emacs Lisp Reference Manual: Deleting Processes~~

Search in Elisp Manual Emacs is bundled with emacs lisp manual in "Texinfo" format. [see Emacs: View Info Page] Alt + x elisp-index-search to find a function's documentation in the emacs lisp manual.

This moves forward one line and continues moving by lines until it reaches an empty line. It is peculiar in that the while has no body, just the end test (which also does the real work of moving point).. The dolist and dotimes macros provide convenient ways to write two common kinds of loops.. Macro: dolist (var list [result]) body... This construct executes body once for each element of list ...

~~GNU Emacs Lisp Reference Manual: Iteration~~

Once it's finished CPU usage will drop down to normal, and Emacs should be more responsive as all loaded elisp code is now compiled natively. At the moment I see myself keeping the build script up to date and working for some time, probably even until native-comp hits a stable release for macOS.
