Grading Sheets And Rubrics - Teachers Printables

Board grade – A grade given to corrugated board based on three elements; firstly, the weight and type of outer liner, secondly the type of flute and thirdly the weight and type of inner liner.

Burst, damage – the term given to packaging containers which split or “burst” due to too much pressure (e.g. if stacked too high, the boxes lower in the stack may burst).

Paper Weights and Thickness Explained - Peppermint Print Blog

A grade threshold is the minimum number of marks that a candidate needs to obtain a particular grade in a paper or in a subject. These thresholds are decided after each examination has been taken and marked. The aim in each year (or examination series) is to set each threshold in just the right place to ensure that it is no more difficult and no less difficult to obtain that grade than it was ...
