Honda makes a good engine, but so don't the other manufacturers. I have one of just about every engine on a piece of equipment I own. The 25 hp kohler command in my cub cadet runs awesome, same for the 18 hp vanguard in my generator and the 8 hp tecumseh in my Ariens snowblower. I will say Honda's self propelled mowers suck. They are not worth the money. I have to replace the drive wheels ...

All engines. Honda's automatic mechanical decompression system is designed to give you quicker, easier starts. This system, which is connected to the camshaft, reduces compression by opening the exhaust valve slightly when the engine is being started. This reduces the amount of force needed to start the engine and improves starting performance.

Net horsepower more closely correlates with the power the operator will experience when using a Honda engine powered product. The power rating of the engines indicated in this document measures the net power output at 3600 rpm (7000 rpm for model GXH50, GXV50, GX25 and GX35) and net torque at 2500 rpm, as tested on a production engine. Mass production engines may vary from this value. Actual ...

I used to sell both, the Honda is gonna be the top of the line when it comes to small engines. Kohler is a good engine as well. The only problem with Kohler engines is that when they breakdown it is harder to find parts or someone trained to work on them. Honda parts are easy to find and have someone trained to work on them.
