Leonardo da Vinci - Biography - The History Channel
Leonardo da Vinci was a man of many talents. He was an artist, inventor, scientist, and more. He lived in the 15th and 16th centuries and was one of the most influential people of his time.

The #1 New York Times bestseller from Walter Isaacson brings Leonardo da Vinci to life in this exciting new biography that is “ a study in creativity: how to define it, how to achieve it...Most important, it is a powerful story of an exhilarating mind and life ” (The New Yorker). Based on thousands of pages from Leonardo da Vinci ’ s astonishing notebooks and new discoveries about his life and work, Walter Isaacson “ deftly reveals an intimate Leonardo ” (San Francisco Chronicle) in a narrative that connects his art to his science. He shows how Leonardo ’ s genius was based on skills we can improve in ourselves, such as passionate curiosity, careful observation, and an imagination so playful that it flirted with fantasy. He produced the two most famous paintings in history, The Last Supper and the Mona Lisa. With a passion that sometimes became obsessive, he pursued innovative studies of anatomy, fossils, birds, the heart, flying machines, botany, geology, and weaponry. He explored the math of optics, showed how light rays strike the cornea, and produced illusions of changing perspectives in The Last Supper. His ability to stand at the crossroads of the humanities and the sciences, made iconic by his drawing of Vitruvian Man, made him history ’ s most creative genius. In the “ luminous ” (Daily Beast) Leonardo da Vinci, Isaacson describes how Leonardo ’ s delight at combining diverse passions remains the ultimate recipe for creativity. So, too, does his ease at being a bit of a misfit: illegitimate, gay, vegetarian, left-handed, easily distracted, and at times heretical. His life should remind us of the importance to be imaginative and, like talented rebels in any era, to think different. Here, da Vinci “ comes to life in all his remarkable brilliance and oddity in Walter Isaacson ’ s ambitious new biography...a vigorous, insightful portrait ” (The Washington Post).

"Presents the life and accomplishments of the famous artist, scientist, engineer, and inventor."--Amazon.com.

Painter, sculptor, architect, musician, scientist, mathematician, engineer, inventor, anatomist, geologist, cartographer, botanist, and writer, Leonardo da Vinci was a genius who was well ahead of his time and the best example of the Renaissance man. This is the story of one of the greatest painters of all time, and perhaps the most diversely talented person ever to have lived. Leonardo grew up in the hamlet of Anchiano in Tuscany where he received an informal education. Young Leonardo had an unquenchable curiosity in life and moved to Florence where he took an interest in painting. At the age of fourteen, Leonardo began an apprenticeship with Andrea del Verrocchio. Here, his talent blossomed and as fate would have it, he was soon employed by the rich and powerful Duke of Milan. Soon, Leonardo moved to the city of Rome, where some of the greatest artists of the time lived. This tale traces the fascinating life of one of the best and most famous artists that the world has ever seen.

A biography of the notable Italian Renaissance artist, scientist, and inventor.

In this classic, engrossing text, a distinguished historian explores the mind and manifold interests of the great personality of the Renaissance. It traces the artist's travels, examines his manuscripts and their philosophical revelations, and assesses his art.nbsp;This book remains one of the best introductions to Leonardo and his extraordinary versatility. 16 black-and-white illustrations.

A singular fatality has ruled the destiny of nearly all the most famous of Leonardo da Vinci's works. Two of the three most important were never completed, obstacles having arisen during his life-time, which obliged him to leave them unfinished; namely the Sforza Monument and the Wall-painting of the Battle of Anghiari, while the third—the picture of the Last Supper at Milan—has suffered irremediable injury from decay and the repeated restorations to which it was recklessly subjected during the XVIIth and XVIIIth centuries. Nevertheless, no other picture of the Renaissance has become so wellknown and popular through copies of every description.

Provides step-by-step instructions for creating various projects that Leonardo da Vinci invented or envisioned in his notebooks using everyday household items.
