Edgar Award Finalist: This “sensational” and “absolutely compelling” true crime tale finally answers the question: Who really killed the Lindbergh baby? (San Francisco Chronicle). On the night of March 1, 1932, celebrated aviator Charles Lindbergh’s infant son was kidnapped from his New Jersey home. The family paid \$50,000 to get “Little Lindy” back, but his remains were discovered in a grove of trees four miles from the Lindbergh house. More than two years after the abduction, Bruno Hauptmann, an unemployed carpenter and illegal German immigrant, was caught with \$20,000 of the ransom money. He was arrested, tried, and executed for the crime. But did he really do it? New York Times–bestselling author Noel Behn spent eight years investigating the case, revisiting old evidence, discovering new information, and shining a bright light on the controversial actions of public figures such as New Jersey Governor Harold Hoffman, FBI Director J. Edgar Hoover, New Jersey State Police Superintendent H. Norman Schwarzkopf, and Charles Lindbergh himself. The result is a fascinating and convincing new theory of the crime that exonerates Hauptmann and names a killer far closer to the Lindbergh family. A finalist for the Edgar Award, Lindbergh “not only provides answers to the riddles of the ‘Crime of the Century,’ but hurls us into time past, to a special moment in American history” (Peter Maas, New York Times–bestselling author of Underboss).

Traces the two-and-a-half year investigation by the New Jersey State Police of the Lindbergh kidnapping case, challenging the effectiveness of the investigation and the evidence that convicted Bruno Hauptmann.

The biggest crime story in American history began on the night of March 1, 1932, when the twenty-month-old son of Charles and Anne Lindbergh was snatched from his crib in Hopewell, New Jersey. The news shocked a nation enthralled with the aviator, the first person to fly solo nonstop across the Atlantic. American law enforcement marshalled all its resources to return “Little Lindy” to the arms of his parents—and perhaps even more energized were the legions of journalists catering to a public whose appetite for Lindbergh news was insatiable. In Little Lindy Is Kidnapped, Thomas Doherty offers a lively and comprehensive cultural history of the media coverage of the abduction and its aftermath. Beginning with Lindbergh’s ascent to fame and proceeding through the trial and execution of the accused kidnapper, Doherty traces how newspapers, radio, and newsreels reported on what was dubbed the “crime of the century.” He casts the affair as a transformative moment for American journalism, analyzing how the case presented new challenges and opportunities for each branch of the media in the days before the rise of television. Coverage of the Lindbergh story, Doherty reveals, set the template for the way the media would treat breaking news ever after. An engrossing account of an endlessly fascinating case, Little Lindy Is Kidnapped sheds new light on an enduring quality of journalism ever since: the media’s eye on a crucial part of the story—itself.

In 1936, Bruno Richard Hauptmann was executed for the kidnapping and murder of Charles Lindbergh Jr. Almost all of America believed Hauptmann guilty; only a few magazines and tabloids published articles questioning his conviction. In the ensuing decades, many books about the Lindbergh case have been published. Some have declared Hauptmann the victim of a police conspiracy and frame-up, and one posited that Lindbergh actually killed his own son and fabricated the entire kidnapping to mask the deed. Because books about the crime have been used as a means to advance personal theories, the truth has often been sacrificed and readers misinformed. Hauptmann's Ladder is a testament to the truth that counters the revisionist histories all too common in the true crime genre. Author Richard T. Cahill Jr. puts the "true" back in "true crime," providing credible information and undistorted evidence that enables readers to form their own opinions and reach their own conclusions. Cahill presents theories based upon facts and documentary evidence uncovered in his twenty years of research. Using primary sources and painstakingly presenting a chronological reconstruction of the crime and its aftermath, he debunks false claims and explodes outrageous theories, while furnishing evidence that has never before been revealed. Hauptmann's Ladder is a meticulously researched examination of the Lindbergh kidnapping that restores and preserves the truth of the crime of the century. Book jacket.

Essential reading for anyone interested in the most famous American crime of the twentieth century Since its original publication in 2004, The Case That Never Dies has become the standard account of the Lindbergh Kidnapping. Now, in a new afterword, historian Lloyd C. Gardner presents a surprise conclusion based on recently uncovered pieces of evidence that were missing from the initial investigation as well as an evaluation of Charles Lindbergh's role in the search for the kidnappers. Out of the controversies surrounding the actions of Colonel Lindbergh, Norman Schwarzkopf, commander of the New Jersey State Police, and FBI director J. Edgar Hoover, Gardner presents a well-reasoned argument for what happened on the night of March 1, 1932. The Case That NeverDies places the Lindbergh kidnapping, investigation, and trial in the context of the Depression, when many feared the country was on the edge of anarchy. Gardner delves deeply into the aspects of the case that remain confusing to this day, including Lindbergh’s dealings with crime baron Owney Madden, Al Capone’s New York counterpart, as well as the inexplicable exploits of John Condon, a retired schoolteacher who became the prosecution’s best witness. The initial investigation was hampered by Colonel Lindbergh, who insisted that the police not attempt to find the perpetrator because he feared the investigation would endanger his son’s life. He relented only when the child was found dead. After two years of fruitless searching, Bruno Richard Hauptmann, a German immigrant, was discovered to have some of the ransom money in his possession. Hauptmann was arrested, tried, and sentenced to death. Throughout the book, Gardner pays special attention to the evidence of the case and how it was used and misused in the trial. Whether Hauptmann was guilty or not, Gardner concludes that there was insufficient evidence to convict him of first-degree murder. Set in historical context, the book offers not only a compelling read, but a powerful vantage point from which to observe the United States in the 1930s as well as contemporary arguments over capital punishment.

In the depths of the Depression, millions worldwide followed every twist and turn of the Lindbergh baby kidnap/murder. Yet what was reported was largely fake news. Nearly a century after undocumented immigrant Bruno Richard Hauptmann was executed for the dastardly crime, questions still linger. If the wrong man was convicted, who did it? When? Why? Where? How? The shocking answers this book suggests have eluded all prior authors. Extensive research into dusty archives yielded crucial forensic evidence never before analyzed. Readers are invited to reexamine "the crime of the century" with fresh eyes focused on a key suspect - a tall man wearing a fedora that obscured his face. He was spotted with a ladder in his car near the Lindberghs' driveway early that fateful night. The police let an insider who fit that description oversee the entire investigation - the boy's father, international hero Charles Lindbergh. Abuse of power, amorality and xenophobia all feature in this saga set in an era dominated by white supremacists and social Darwinists. If Lindbergh was Suspect No. 1, the man who got away, what was his motive? Who else was involved? Who helped cover up the crime? Read this book and judge for yourself.
