Mathematical Statistics, Basic Ideas and Selected Topics ...  
1 Basic Ideas of Mathematical Statistics. Elementary statistical computations have been carried out for thousands of years. For example, the arithmetic mean from a number of measures or observation data has been known for a very long time. First descriptive statistics arose starting with the collection of data, for example, at the national census or in registers of medical cards, and followed by compression of these data in the form of statistics or graphical representations (figures).
