Michael Crichton, the #1 New York Times bestselling author of Jurassic Park, comes an astounding, eye-opening look at the world of genetics as it¶s happening now, told as only Michael Crichton can tell it, with lightening fast pacing and thrilling chases. Welcome to our genetic world. Fast, furious, and out of control. This is not the world of the future¶it¶s the world right now. Is a loved one missing some body parts? Are blondes becoming extinct? Is everyone at your dinner table of the same species? Humans and chimpanzees differ in only 400 genes; is that why an adult human being resembles a chimp fetus? And should that worry us? There¶s a new genetic cure for drug addiction¶is it worse than the disease? We live in a time of momentous scientific leaps; a time when it¶s possible to sell our eggs and sperm online for thousands of dollars; test our spouses for genetic maladies and even frame someone for a genetic crime. We live in a time when one fifth of all our genes are owned by someone else, and an unsuspecting person and his family can be pursued cross-country because they happen to have certain valuable genes within their chromosomes... Devilishly clever, Next blends fact and fiction into a breathless tale of a new world where nothing is what it seems, and a set of new possibilities can open at every turn.

Michael Crichton's Prey is a terrifying page-turner that masterfully combines a heart¶pounding thriller with cutting-edge technology. Deep in the Nevada desert, the Xymos Corporation has built a state-of-the-art fabrication plant, surrounded by miles and miles of nothing but cactus and coyotes. Eight people are trapped. A self-replicating swarm of predatory molecules is rapidly evolving outside the plant. Massed together, the molecules form an intelligent organism that is anything but benign. More powerful by the hour, it has targeted the eight scientists as prey. They must stop the swarm before it is too late¶ In Prey, Michael Crichton combines scientific brilliance with relentless pacing to create an electrifying, chilling techno-thriller

From the author of Jurassic Park, Timeline, and Congo comes a psychological thriller about a group of scientists who investigate a spaceship discovered on the ocean floor. In the middle of the South Pacific, a thousand feet below the surface, a huge vessel is unearthed. Rushed to the scene is a team of American scientists who descend together into the depths to investigate the astonishing discovery. What they find defies their imaginations and mocks their attempts at logical explanation. It is a spaceship, but apparently it is undamaged by its fall from the sky. And, most startling, it appears to be at least three hundred years old, containing a terrifying and destructive force that must be controlled at all costs.

A sequel to the best-selling Robopocalypse is told through a series of narratives that finds new and former characters fighting to rebuild a war-stricken world under threat of the surviving Archos machine code. 100,000 first printing.

In a novel set within the arena of volatile Japanese-American relations, business moguls compete for control of the international electronics industry.

From the bestselling author of Jurassic Park, Timeline, and Sphere comes a deeply personal memoir full of fascinating adventures as he travels everywhere from the Mayan pyramids to Kilimanjaro. Fueled by a powerful curiosity¶and by a need to see, feel, and hear, firsthand and close-up¶Michael Crichton's journeys have carried him into worlds diverse and compelling¶swimming with mud sharks in Tahiti, tracking wild animals through the jungle of Rwanda. This is a record of those travels¶an exhilarating quest across the familiar and exotic frontiers of the outer world, a determined odyssey into the unfathomable, spiritual depths of the inner world. It is an adventure of risk and rejuvenation, terror and wonder, as exciting as Michael Crichton's many masterful and widely heralded works of fiction.

A thriller about an Egyptologist¶s greatest find¶and his quest to steal it¶from the #1 New York Times¶bestselling author of Jurassic Park and The Andromeda Strain. Brilliant Egyptologist Harold Barnaby has discovered a message hidden inside a particularly difficult set of hieroglyphics. It just may lead him to a secret tomb holding the greatest riches of the ancient world. Barnaby could put his name to the most fantastic archaeological find of the century. But he doesn¶t just want to dig it up. He wants to steal it. With the help of a smuggler, a thief, and an English lord, he plans his heist. They find that tomb raiding is trickier than they thought, and those who steal from dead Egyptians face dangers worse than a mummy¶s ancient curse. This ebook features an illustrated biography of Michael Crichton including rare images from the author¶s estate.

An agent races to stop a chemical attack in this thriller from the #1 New York Times¶bestselling author of The Andromeda Strain and Jurassic Park. His name is John Wright, and he¶s the most dangerous man in the United States. A millionaire radical with a deep hatred for everything America stands for, he has concocted a scheme that will shatter the very foundation of our democracy¶and he¶s just crazy enough to pull it off. The only man who can stop him is John Graves, an embittered federal agent whose mission in life is to destroy Wright. He¶ll get his chance¶America will burn. A train races across the Utah desert, carrying a shipment of the deadliest nerve gas known to man. Seven mobsters stop the train, steal the gas, and hand it over to Wright. His target? The Republican National Convention in San Diego, where unleashing the gas will kill one million honest citizens, including the US president. Graves has just one shot to stop Wright¶and for the sake of democracy, he¶d better not miss. From ¶the master of the sci-tech thriller,¶ this is a terrifying high-speed novel that will keep you on the edge of your seat from beginning to end (Booklist). This ebook features an illustrated biography of Michael Crichton including rare images from the author¶s estate.

NEW YORK TIMES BESTSELLER Fifty years after The Andromeda Strain made Michael Crichton a household name¶and spawned a new genre, the technothriller¶the threat returns, in a gripping sequel that is terrifyingly realistic and resonant. The Evolution is Coming. In 1967, an extraterrestrial microbe came crashing down to Earth and nearly ended the human race. Accidental exposure to the particle¶designated The Andromeda Strain¶killed every resident of the town of Piedmont, Arizona, save for an elderly man and an infant boy. Over the next five days, a team of top scientists assigned to Project Wildfire worked valiantly to save the world from an epidemic of unimaginable proportions. In the moments before a catastrophic nuclear detonation, they succeeded. In the ensuing decades, research on the microparticle continued. And the world thought it was safe¶ Deep inside Fairchild Air Force Base, Project Eternal Vigilance has continued to watch and wait for the Andromeda Strain to reappear. On the verge of being shut down, the project has registered no activity¶until now. A Brazilian terrain-mapping drone has detected a bizarre anomaly of otherworldly matter in the middle of the jungle, and, worse yet, the tell-tale chemical signature of the deadly microparticle. With this shocking discovery, the next-generation Project Wildfire is activated, and a diverse team of experts hailing from all over the world is dispatched to investigate the potentially apocalyptic threat. But the microbe is growing¶evolving. And if the Wildfire team can¶t reach the quarantine zone, enter the anomaly, and figure out how to stop it, this new Andromeda Evolution will annihilate all life as we know it.
