Msc Adams car for Vehicle Dynamics - Suspension Analysis ... The paper presents a method to analyse the dynamics of passenger cars with McPherson strut suspension systems, which will make it possible to consider the friction that takes place between major components, i.e. piston rod and cylinder, of front shock absorbers. The analysis was carried out with making use of modern tools to support the engineering design process, i.e. the Autodesk Inventor program (used to work out geometric models of the car under consideration), and the MSC.
