This report presents an up-to-date description of emerging hybrid-electric drive technology for transit buses in the United States. The technology and its status, benefits, life-cycle costs, and deployment issues are discussed. The report is intended to provide transit agencies with information to compare the emissions and fuel economy expected from hybrid-electric transit buses with those expected from clean diesel or alternatively fueled buses.

Since CAFE standards were established 25 years ago, there have been significant changes in motor vehicle technology, globalization of the industry, the mix and characteristics of vehicle sales, production capacity, and other factors. This volume evaluates the implications of these changes as well as changes anticipated in the next few years, on the need for CAFE, as well as the stringency and/or structure of the CAFE program in future years.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. With an emphasis on diagnosing and troubleshooting-and featuring numerous tech tips and diagnostic examples throughout-this comprehensive, full-color book covers all aspects of automotive fuel and emissions. Designed specifically to correlate with the NATEF program, and updated throughout to correlate to the latest NATEF and ASE tasks, Automotive Fuel and Emissions Control Systems, 4/e combines topics in engine performance (ASE A8 content area) with topics covered in the advanced engine performance (LI) ASE test content area. The result is cost-efficient, easy-to-learn-from resource for students and beginning technicians alike. This book is part of the Pearson Automotive Professional Technician Series, which features full-color, media-integrated solutions for today's students and instructors covering all eight areas of ASE certification, plus additional titles covering common courses. Peer reviewed for technical accuracy, the series and the books in it represent the future of automotive textbooks.

Second edition. Fred Crisman's timeless classic. A photographic history of International Trucks from 1902-2002. Approximately 2500 b/w photos. Considered by many to be the most authoratative work ever done on International Trucks.

International Marketing is an adaptation of a best-selling German text, which considers the global marketing arena from a new and original perspective. It focuses upon international marketing primarily as the coordination of a company's different national marketing programmes. How can for example an exchange of marketing knowledge across borders add value to a company's position in other markets? What impact does the exchange of goods and information across borders by customers have? What effect can 'going international' have on an international cost position? How can lead markets act as a guide to future developments in other countries? International Marketing takes a comprehensive look at all the underlying concepts, using a wealth of truly European examples and substantial case studies.

Why Not the Best?, originally published in 1975, is President Carter's presidential campaign autobiography, the book that introduced the world to Georgia governor Jimmy Carter and asked the American people to demand the best and highest standards of excellence from our government.
