Paper Pets. In this paper pets genetics learning exercise, students are given 4 genetic traits found in a particular species (paper pet). Students are given the genotypes of the parents of the paper pets and they perform genetic crosses using punnet squares to determine the possibilities of the offspring. Students are given a new genotype for each parent, they draw the traits in the parents and they predict the genotypes of the offspring.

**Paper Pets Worksheet for 8th – 10th Grade | Lesson Planet**

Include your Paper Pet cut outs with detailed traits for each individual. Then draw neat lines to show mating and sibling relationships. Name each pet and give the whole family a family name. Place the phenotype and genotype information for each of your Paper Pet parents and offspring on your poster.
