Plant Taxonomy Practical Manual - indivisiblesomerville.org

Plant taxonomy is the science that finds, identifies, describes, classifies, and names plants. It is one of the main branches of taxonomy. Plant taxonomy is closely allied to plant systematics, and there is no sharp boundary between the two. In practice, "Plant systematics" involves relationships between plants and their evolution, especially at the higher levels, whereas "plant taxonomy" deals with the actual handling of plant specimens. The precise relationship between taxonomy and systematics

Chapter 04: Exercise 4 of Biology Lab Manual (EN) book -
Exercise 4 Aim: Study of tissues and diversity in shapes and sizes of plant cells. Principle: Tissue is a group of cells performing a common function. Tissue may be simple (parenchyma, collenchyma and schlerenchyma) i.e., containing only one type of cells or complex (xylem, phloem) that is containing more than one type of cells. ...

04: Exercise 4 / Biology Lab Manual (EN)

A manual does not need to be exhaustive and its scope is typically user defined (though often based on the scale/range of it's underlying subject). However, some have used the term manual to be more or less synonymous with Flora or otherwise similar document (e.g., see here). A catalog is simply a listing of all species
