Prime Time - 6TH  
GRADE MATH

This is a game for two players. The first player chooses a positive even number that is less than 50, and crosses it out on the grid. The second player chooses a number to cross out. The number must be

# Where To Download

a factor or multiple of the first number. Players continue to take it in turns to cross out numbers, at each stage choosing a number that is a factor or multiple of the number just crossed out by the other player.

Game - NRICH

To sum up, we can say that factors are the numbers that can be multiplied to get another number. On the other hand, multiples are the product, that one can get by multiplying a number with another. When a number possesses only two factors, i.e. 1

# Where To Download

and itself, then that number will be known as a prime number.

## Factors, Multiples and Primes

1 is a factor of every whole number, because every integer is divisible by one. Examples. 3 and 7 are both factors of 21 because  $3 \times 7 = 21$ . 10 and 6 are both factors of 60 because  $10 \times 6 = 60$ . 7 is not a factor of 24 because

Factors, Multiples  
and Primes - YouTube

For example, the  
proper factors of 12  
are 1, 2, 3, 4, and 6.  
Although 12 is also a  
factor of 12, it is not  
considered a proper  
factor. All of the

# Where To Download

proper factors that  
Player 2 selects will  
be colored red. Player  
2 will receive  $1 + 2 +$   
 $3 + 4 + 6 = 16$  points  
for selecting all of the  
proper factors.  
Players reverse roles.
