Investigation 1: Making Sense of Samples, ACE #1-2 Investigation 2: Choosing a Sample From a Population, ACE #5-8 Investigation 3: Using Samples to Draw Conclusions, ACE #3-4 Investigation 1: Making Sense of Samples ACE #1-2 For Exercises 1 and 2, use the table below.

Samples & Populations: Homework Examples from ACE

A sample is a smaller group of members of a population selected to represent the population. In order to use statistics to learn things about the population, the sample must be random. A random sample is one in which every member of a population has an equal chance of being selected. The most commonly used sample is a simple random sample.
