SAP - Quick Guide - Tutorialspoint

SAP R/3 is the former name of the enterprise resource planning software produced by the German corporation SAP AG. It is an enterprise-wide information system designed to coordinate all the resources, information, and activities needed to complete business processes such as order fulfillment, billing, human resource management, and production planning. The current successor software to SAP R/3 is known as SAP S/4HANA.

In SAP R/3, you can make various manual changes to in-house production orders with interchangeable components. For example, you can change the receipt quantity or the availability date/time. For these changes, SAP R/3 does not take account of the product interchangeability master data in SAP APO.

---

## Manual Changes to an Order in SAP R/3 - SAP Documentation

SAP R/3 is the oldest version of the three SAP systems considered here. The name R/3 comes from the three-level architecture of the software. The first level from the user's point of view is the presentation level on which the user interface is located. Below this is the application level, which represents the business logic.
