This is a Vetus 33 Hp Diesel which was on a Westsail 32 and underwater for 3 weeks. I "pickled" the engine and got it running wihin 48 hours of the refloat.

Diesel Engine restarted after underwater - YouTube

Starting an Engine That was Running When Submerged As a first step, remove weeds, mud, silt, or sand from the engine exterior and thoroughly clean with a mild detergent, then rinse with freshwater and a hose. Remove the engine cowling and rinse exposed interior parts. Drain any remaining fuel into a bucket.

How to Fix Drowned Outboard Engines - GetMyBoat

Creating a vehicle that can run submerged is a challenge -- In order for any type of combustion engine to run it must have a source of air, and it must be able to release exhaust gasses. If the water is not too deep (a few feet), the exhaust gases can take care of themselves because they are under pressure.
