One simple way to see if a figure is symmetrical is to draw it on paper and fold it in half. If the sides match completely, it is symmetrical. Drawing Lines of Symmetry. ~~Lines of Symmetry | Helping With Math~~

A shape or pattern is symmetrical when it is identical on both sides. If you place a mirror on the central line or the line of symmetry, the reflection should look identical to the original shape or pattern.

Regular shapes always have lines of symmetry, and the number of lines of symmetry is equal to the number of sides of the shape. Some irregular shapes have lines of symmetry, but the more irregular a shape is, the less likely it is to have a line of symmetry. Below is a guide on how to
