One of America's top tax lien and tax deed investors and instructors reveals high-profit money-generating tax sales and tax auction investment techniques covered almost nowhere else, yet also explains the basics and the potential dangers for tax lien investors just starting out in this lucrative area. This quick short and easy-to-read glimpse inside the real world of tax lien and tax deed investing is a must-have book for any serious tax deed or tax lien real estate property investor!

The Big Book of Design Ideas 3 is the third of its kind. Like its predecessors, each piece in it was chosen for its ability to inspire others to create wonderful design. Full of hundreds of innovative ideas, this book can offer the impetus you need to upscale your present project from good to great. Offering similarly innovative design solutions, the first volume, The Big Book of Design Ideas, became one of the best-selling graphic design books. From advertising to logos, from book jackets to websites, The Big Book of Design Ideas 3 showcases some of the most creative work in the world. There's great inspiration in being exposed to great work. Look through The Big Book of Design Ideas 3 and be inspired.

This book details a new paradigm in real estate management and development, creating a more symbiotic relationship between the built environment and the natural world. Working with, not against the forces of nature opens up a plethora of creative, profitable and efficient solutions to common problems, while retaining the balance and integrity of the surrounding landscape. In most cases the net results include reduced operating/building costs, healthier environments, and increased property values. Included are case studies and financial analyses demonstrating the pros and cons of new building/design technologies, and integrated methods of land, water, and building management. The book also discusses false belief systems that may go to the root of our environmental degradation, and outlines current legislation affording protection and legal rights to ecosystems worldwide. This is an antidote to mainstream real estate management and development practices of conformity, inefficiency, and disregard for living systems. It is the means by which people can profit by creating more ecological balance in the world, while using their real estate to do so. Owners, renters, property managers, or anyone involved with real estate on any level can help create a major shift in our relation to the world--from wasteful consumption, to regeneration. Don Kulak witnessed numerous cash flow, health, and environmental problems during his 13-plus years in real estate management and publishing. Having participated in countless planning and zoning board meetings, he came to realize peoples' real concerns are being neglected in favor of larger corporate interests. He developed a more integrated way to solve these issues, while helping people become more self-reliant and less dependent on wasteful and polluting modalities. Benefits Include: Manage real estate for more profit, independence and self-reliance Investment analyses of sustainable upgrades with the highest returns Case studies detailing how lake water quality drastically affects surrounding property values. Learn how to turn polluted, algae-ridden lakes into healthy, balanced ecosystems without chemicals or dredging Toxic fracking wastewater is being injected into water supplies around the world. See how local and national governments are drafting and enforcing "Rights of Nature" legislation to prevent corporate pollution and exploitation. Solve flooding problems and health-threatening sewer overflows while replenishing aquifers Learn how to size and specify your solar electric system Create more leasable space for your commercial building while reducing HVAC costs Learn more efficient, durable, and less expensive alternatives to traditional copper piping systems Do you think we live in a democracy? See how true participatory democracy worked in Native American governments. We have been led to believe living with "acceptable" amounts of contamination is a necessary by product of modern society. You can start reversing this trend now, with your own real estate.

A real estate journalist and e-publisher offers tips on how to succeed as an on-line agent, broker, lender, and relocation specialist.

This is the definitive and essential text on creating and sponsoring real estate investment groups. Written by a nationally renowned attorney whose practice is limited to the complex legal aspects of these kinds of securities; it is a concise, easily understood and practical guide on how to proceed. It contains all the basics you need to grasp in the US Securities and Exchange Commission (SEC) regulations governing this kind of investment. The text includes details of the SEC's rules governing the Jobs Act. Long term, this federal legislation is likely to be a game-changer in the syndication of commercial real estate. Regulation A+, finalized just before publication, may provide an important new capital-raising option for smaller companies. The portion of the Act that has been in force since September 2013, allowing for public advertising of fundraising, is also thoroughly examined. Author Gene Trowbridge, Esq., CCIM, works as a lawyer for and consultant to individuals and organizations engaged in group sponsorships and conducts seminars and workshops throughout the country. He has also been a distinguished and
