Orson Scott Card's The Lost Gate is the first book in the Mithermages series from the New York Times bestselling author of Ender's Game. Danny North knew from early childhood that his family was different, and that he was different from them. While his cousins were learning how to create the things that commoners called fairies, ghosts, golems, trolls, werewolves, and other such miracles that were the heritage of the North family, Danny worried that he would never show a talent, never form an outself. He grew up in the rambling old house, filled with dozens of cousins, and aunts and uncles, all ruled by his father. Their home was isolated in the mountains of western Virginia, far from town, far from schools, far from other people. There are many secrets in the House, and many rules that Danny must follow. There is a secret library with only a few dozen books, and none of them in English – but Danny and his cousins are expected to become fluent in the language of the books. While Danny's cousins are free to create magic whenever they like, they must never do it where outsiders might see. Unfortunately, there are some secrets kept from Danny as well. And that will lead to disaster for the North family. The Mithermages series The Lost Gate The Gate Thief Gatefather At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

From the author of Wittgenstein's Poker and Would You Kill the Fat Man?, the story of an extraordinary group of philosophers during a dark chapter in Europe's history On June 22, 1936, the philosopher Moritz Schlick was on his way to deliver a lecture at the University of Vienna when Johann Nelböck, a deranged former student of Schlick's, shot him dead on the university steps. Some Austrian newspapers defended the madman, while Nelböck himself argued in court that his onetime teacher had promoted a treacherous Jewish philosophy. David Edmonds traces the rise and fall of the Vienna Circle—an influential group of brilliant thinkers led by Schlick—and of a philosophical movement that sought to do away with metaphysics and pseudoscience in a city darkened by fascism, anti-Semitism, and unreason. The Vienna Circle's members included Otto Neurath, Rudolf Carnap, and the eccentric logician Kurt Gödel. On its fringes were two other philosophical titans of the twentieth century, Ludwig Wittgenstein and Karl Popper. The Circle championed the philosophy of logical empiricism, which held that only two types of propositions have cognitive meaning, those that can be verified through experience and those that are analytically true. For a time, it was the most fashionable movement in philosophy. Yet by the outbreak of World War II, Schlick's group had disbanded and almost all its members had fled. Edmonds reveals why the Austro-fascists and the Nazis saw their philosophy as such a threat. The Murder of Professor Schlick paints an unforgettable portrait of the Vienna Circle and its members while weaving an enthralling narrative set against the backdrop of economic catastrophe and rising extremism in Hitler's Europe.

We live in an era where the university system is undergoing great changes owing to developments in financing policies and research priorities, as well as changes in the society in which this system is embedded. This change toward a more market-oriented university, which also has immediate effects in academic peripheries such as the Balkans, the Middle East, or South-East Asia, is of great influence for the pedagogical practice of "less profitable" academic areas such as the Humanities: philosophy, languages, sociology, anthropology, history. This volume (presented in a dual-language English-Albanian edition) comprises papers culled from continent. journal's Pedagogies of Disaster conference held in Tirana, Albania, hosted by The Department of Eagles (Departamenti i Shqiponjave) in June 2013, and organized to address the fate of relation and the future of pedagogical practice in the University, and especially as it concerns the humanities. The papers gathered here seek to address the infrastructural or interpersonal changes in the modes of production as it relates to current academia, examining the elements and spaces of the rifts opening up in the polis of the University-its students, professors and administrators. The volume further addresses the pedagogical horizon at a critical limit, asking: for whom or for what are we teaching and from whom or from what are we learning?
