In his nearly thirty years at CBS News, Emmy Award-winner Bernard Goldberg earned a reputation as one of the preeminent reporters in the television news business. When he looked at his own industry, however, he saw that the media far too often ignored their primary mission: objective, disinterested reporting. Again and again he saw that they slanted the news to the left. For years Goldberg appealed to reporters, producers, and network executives for more balanced reporting, but no one listened. The liberal bias continued. In this classic number one New York Times bestseller, Goldberg blew the whistle on the news business, showing exactly how the media slant their coverage while insisting they're just reporting the facts.

Distortions is about the power behind producing deviant media categories. This book examines the politics behind categories we take for granted such as spam and noise, and what this power means for our broader understanding of media.

Does 'fake news' really exist? Find out from the ultimate insider. After years of working as a respected journalist, Nick Davies, in this shocking exposé, reveals what really goes on behind the scenes of this contentious industry. From a prestigious newspaper that allowed intelligence agencies to plant fiction in its columns, to the newsroom that routinely rejected stories due to racial bias, to the number of papers that accepted cash bribes. Gripping, thought-provoking and revelatory, this is an insider's look at one of the most tainted professions. 'Meticulous, fair-minded and utterly gripping' Telegraph 'Powerful and timely...his analysis is fair, meticulously researched and fascinating' Observer

A rare and insightful account by a newsroom insider of how the news skews our perceptions and disorients society 'Fake news' has become a ubiquitous catchphrase and a worldwide obsession. Yet too few of us know that shades of falsehood have always run through the mainstream news media. As news organizations double-down in their efforts to shock and entertain, more people than ever before are tuning-out, disillusioned by negative and manipulative news cycles. In *Veils of Distortion*, John Zada draws on two decades of journalism experience to explain how and why the news has become broken. By depicting our world through a tiny sample of dramatized events that are often far-removed from our experiences, the news warps our picture of reality. What we see is not the world that actually is, but rather a caricature of it: a simple two-toned realm in which dangers and conflicts lurk around every corner. The societal angst that results can make the news a self-fulfilling prophecy, and can turn our minds into prisons of blinkered thought. Zada walks us through the newsroom to reveal these distorting 'veils.' He offers suggestions on how to mitigate the effects of this coarse infotainment, which, if left unchecked will continue to dumb down and polarize our society, causing it to further unravel.

Could Al Franken and his left-wing cronies possibly be right? Is liberal media bias just a myth propagated by conservatives, and have the mainstream media actually swung to the right? Absolutely not. In the new book *Weapons of Mass Distortion*, L. Brent Bozell III—founder and president of the Media Research Center, America's largest and most respected media watchdog organization—presents the definitive account of how liberal bias in the news industry is alive and well. But here's the thing: The liberal media are headed for a downfall. Bozell demonstrates how their monopoly on information is at last coming to an end, in large part because journalists continue to deny the bias that infects their news coverage. His unrivaled expertise allows him to show readers exactly how the media landscape is changing—and to expose the even bigger changes that are coming. Marshaling an astonishing amount of evidence, Bozell documents exactly how the news media deliberately attempt to set the national agenda through their slanted coverage. In the process he destroys the arguments that Franken and many other left-wing commentators have put forward regarding media bias. *Weapons of Mass Distortion* also reveals:

- How the liberal media's slanted coverage of President George W. Bush will play a huge role in the 2004 elections
- Why liberals' claims about the influence of Fox News and the "conservative media" are wrong—and deliberately

misleading • How the mainstream press has waged war on the war on terrorism • Never-before-told stories of how leading journalists, behind the scenes, betray the liberal bias they so forcefully deny in public—incidents that Bozell has witnessed firsthand • How the same journalists who condemn the Right for “hate speech” regularly launch (and get away with) vicious personal attacks on conservatives • Clear evidence that the major news outlets are hemorrhaging viewers, readers, and listeners precisely because of their liberal bias By dominating the news media for so long, liberals have been able to control what we see and hear. But as Bozell makes clear, the Left will lose that control soon enough.

In recent years, stories of reckless lawyers and greedy citizens have given the legal system, and victims in general, a bad name. Many Americans have come to believe that we live in the land of the litigious, where frivolous lawsuits and absurdly high settlements reign. Scholars have argued for years that this common view of the depraved ruin of our civil legal system is a myth, but their research and statistics rarely make the news. William Haltom and Michael McCann here persuasively show how popularized distorted understandings of tort litigation (or tort tales) have been perpetuated by the mass media and reform proponents. *Distorting the Law* lays bare how media coverage has sensationalized lawsuits and sympathetically portrayed corporate interests, supporting big business and reinforcing negative stereotypes of law practices. Based on extensive interviews, nearly two decades of newspaper coverage, and in-depth studies of the McDonald's coffee case and tobacco litigation, *Distorting the Law* offers a compelling analysis of the presumed litigation crisis, the campaign for tort law reform, and the crucial role the media play in this process.

This book acts as a battering ram against the distortions, myths and outright lies that have been shoved down our throats by the government, the media, corporations, organized religion, the scientific establishment and others who want to keep the truth from us. A group of researchers - investigative reporters, political dissidents, academics, media watchdogs, scientist-philosophers, social critics and rogue scholars - paints a picture of a world where crucial stories are ignored or actively suppressed and the official version of events has more holes in it than Swiss cheese. A world where real dangers are downplayed and nonexistent dangers are trumpeted. In short, a world where you are being lied to. You'll discover that a human being has already been cloned; Joseph McCarthy was not paranoid; museums refuse to display artifacts that conflict with the theory of evolution; the CIA has admitted to involvement in the drug trade; parents don't affect who their children become; plus further revelations involving Columbine, WWII, textbooks, Al Gore, George W. Bush, Timothy Leary and much more.

This revised and updated edition of the classic myth-busting anthology shines a harsh light on the disinformation of government, mass media and more. In 2001, Russ Kick's *You Are Being Lied To* became a cultural phenomenon, spreading the eye-opening insights of writers like Noam Chomsky, Howard Bloom and others to the masses. Now Kick returns with *You Are STILL Being Lied To*, a thoroughly updated edition that contains more than a dozen all-new essays from contributors like Norman Solomon, Graham Hancock, Alex Jones, John Major Jenkins, Robert

Bauval, Richard DeGrandpre, Alexandra Bruce, John Hogue, Gregory Davis, and Scott Creighton. These outspoken authors tackle topics ranging from the misleading marketing of antidepressants to the truth about the North American Union, media consolidation, and the New Thought movement. This massive collection dismantles the distortions, myths, and outright lies propagated by the government, the media, corporations, organized religion, the scientific establishment, and others who want to keep the truth from us. An unprecedented group of researchers including Howard Zinn, Noam Chomsky, Howard Bloom, Sydney Schanberg, Michael Parenti, Riane Eisler, Jim Marrs, and many others reveal how crucial stories are suppressed, real dangers are down-played, and nonexistent dangers are trumpeted in a world where you are still being lied to.

As cash-strapped metropolitan newspapers struggle to maintain their traditional influence and quality reporting, large national and international outlets have pivoted to serving readers who can and will choose to pay for news, skewing coverage toward a wealthy, white, and liberal audience. Amid rampant inequality and distrust, media outlets have become more out of touch with the democracy they purport to serve. How did journalism end up in such a predicament, and what are the prospects for achieving a more equitable future? In *News for the Rich, White, and Blue*, Nikki Usher recasts the challenges facing journalism in terms of place, power, and inequality. Drawing on more than a decade of field research, she illuminates how journalists decide what becomes news and how news organizations strategize about the future. Usher shows how newsrooms remain places of power, largely white institutions growing more elite as journalists confront a shrinking job market. She details how Google, Facebook, and the digital-advertising ecosystem have wreaked havoc on the economic model for quality journalism, leaving local news to suffer. Usher also highlights how the handful of likely survivors—well-funded media outlets such as the New York Times—increasingly appeal to a global, “placeless” reader. *News for the Rich, White, and Blue* concludes with a series of provocative recommendations to reimagine journalism to ensure its resiliency and its ability to speak to a diverse set of issues and readers.
