Gardner states that learning styles refer to the way an individual is most comfortable approaching a range of tasks and materials. Multiple intelligences theory states that everyone has all eight intelligences at varying degrees of proficiency and an individual’s learning style is unrelated to the areas in which they are the most intelligent.

Russell Page was one of the most famous landscape gardeners in Europe. This is his classic text describing his training and the making of his many and celebrated gardens. Written in clear, elegant prose, illustrated with a substantial photographic section, this edition boasts pictures by Marina Schinz of Russell Page's gardens in a more mature form and hitherto unpublished photographs from the author's files with a foreword and captions by Fred Whitsey, gardening correspondent to the Daily Telegraph.

This is a classic memoir by one of the most famous landscape gardeners of the 20th century which describes the author's training and the development of his many celebrated gardens. Russell Page was born in 1906 and studied art at the Slade School in London before a love of plants drew him to garden design. In his career he designed gardens all over the world, from Leeds Castle in Kent to the Donald M. Kendall Sculpture Garden at the Pepsi Cola Headquarters in New York, as well as in France, his home for many years. *The Education of a Gardener* is a fascinating portrait of a master of his craft and has proved an inspirational book for many gardeners since its first publication in 1962. Written in clear and elegant prose, it is illustrated with a substantial number of photographs, including, in this edition, hitherto unpublished pictures from Page's files.

“One of the distinguished gardening books of our time,” from the #1 New York Times–bestselling author of *The Omnivore's Dilemma* (USA Today). Chosen by the American Horticultural Society as one of the 75 greatest books ever written about gardening After Michael Pollan bought an old Connecticut dairy farm, he planted a garden and attempted to follow Thoreau's example: do not impose your will upon the wilderness, the woodchucks, or the weeds. That ethic did not, of course, work. But neither did

pesticides or firebombing the woodchuck burrow. So Michael Pollan began to think about the troubled borders between nature and contemporary life. The result is a funny, profound, and beautifully written book in the finest tradition of American nature writing. It inspires thoughts on the war of the roses; sex and class conflict in the garden; virtuous composting; the American lawn; seed catalogs, and the politics of planting a tree. A blend of meditation, autobiography, and social history, *Second Nature*, from the renowned author of *The Botany of Desire*, *In Defense of Food*, and other bestsellers, is “as delicious a meditation on one man’s relationship with the Earth as any you are likely to come upon” (*The New York Times Book Review*). “Usually when Americans have wanted to explore their relationship to nature they’ve gone to the wilderness, or the woods. Michael Pollan went to the garden instead . . . and he’s returned with a quirky and pleasing book.” —Annie Dillard “A joy to read.” —Los Angeles Times

With wit and wisdom, an Oxford historian and *Financial Times* gardening columnist recounts his deep passion and appreciation for gardening.

One of our finest writers on one of her greatest loves. Jamaica Kincaid's first garden in Vermont was a plot in the middle of her front lawn. There, to the consternation of more experienced friends, she planted only seeds of the flowers she liked best. In *My Garden* (Book) she gathers all she loves about gardening and plants, and examines it generously, passionately, and with sharp, idiosyncratic discrimination. Kincaid's affections are matched in intensity only by her dislikes. She loves spring and summer but cannot bring herself to love winter, for it hides the garden. She adores the rhododendron *Jane Grant*, and appreciates ordinary *Blue Lake* string beans, but abhors the *Asiatic lily*. The sources of her inspiration -- seed catalogues, the gardener *Gertrude Jekyll*, gardens like *Monet's at Giverny* -- are subjected to intense scrutiny. She also examines the

idea of the garden on Antigua, where she grew up. My Garden (Book) is an intimate, playful, and penetrating book on gardens, the plants that fill them, and the persons who tend them.

This book compiles vital information for gardeners in the unique climates of New York and the Mid-Atlantic area. This indispensable guide includes valuable expert advice, a list of hot and cold tolerance zones for each plant, web sites for information from state universities in the region, and a listing of botanical gardens and arboreta in which to view the listed plants.

"Alison Gopnik, a ... developmental psychologist, [examines] the paradoxes of parenthood from a scientific perspective"--

From 1946, the poet and novelist Vita Sackville-West wrote a gardening column in the Observer. The columns were later collected into a set of books published between 1951 and 1958. Vita's extensive gardening knowledge, her intense passion for her subject and her lively literary flair making these garden writing classics essential for any serious gardener's bookshelf. Volume 2 in a series of four anthologies reproducing the lively gardening columns by Vita Sackville-West. This volume covers 1951–1953.
