A practical and irreverent guide to taking the sting out of feedback and reclaiming it as a motivating, empowering experience for everyone involved. Feedback: the mere mention of the word can make our blood pressure rise and our defenses go up. For many of us, it's a dirty word that we associate with bias, politics, resentment, and self-doubt. However, if we take a step back and think about its true intent, we realize that feedback needn't be a bad thing. After all, understanding how others experience us provides valuable opportunities to learn and grow. Authors M. Tamra Chandler and Laura Grealish explain how feedback got such a bad rap and how to recognize and minimize the negative physical and emotional responses that can erode trust and shut down communication. They offer a new and more ambitious definition of feedback, explore the roles we each play as Seeker, Extender, and Receiver, and introduce the three Fs of making feedback focused, fair, and frequent. You'll also find valuable exercises and strategies, along with real-world examples that illustrate how you can put these ideas into action and join in the movement to fix feedback, once and for all. When it's done right, feedback has been proven to be the most effective means of improving communication and performance for you and your organization. It's too important to give up, and with Chandler and Grealish's help, you'll be able to use it deftly, equitably, and effectively.

The purpose of this book is to provide readers with an overview of basic group dynamics and techniques that are effective in Higher Education and Student Affairs settings.--Steven McCullar, St. Cloud State University

Love hurts. Breaking up is hard to do. For all the joy that relationships and friendships can bring, showing romantic interest, establishing boundaries, and expressing identities as partners and friends isn't easy for teens. They navigate an often ugly social universe. Even commonplace struggles can derail academic focus and harm emotional health. English teachers hope to give students communication skills, a love of literature, a passport to an intellectually vibrant life rich in opportunity. Through discussions of canonical works of literature, assignment ideas, anecdotes from teaching, and student perspectives, this book outlines how an academically rigorous English class can also heal, empower, and provide wisdom for teens weathering storms in their social lives. English class is health class. Widely taught novels brim with rich lessons about courtship, love, heartbreak, sexuality, bonds, and belonging. Learning to write stories, reflections, and arguments, speak confidently, and listen critically gives students powerful tools for self-expression, advocacy, and empathy in their relationships and friendships. The stakes are high and the rewards far-reaching. Students with healthier social lives do better academically, but they also end up becoming more responsible, caring grown-ups capable of improving an adult society that too often feels unsafe and tragically bereft of compassion.

Fun Facts to Engage Students: Questions to Inspire Thinking and Learning includes hundreds of multiple-choice, true/false, fill-in-the-blank, and open-ended questions that provide an opportunity for readers to test their knowledge of myriad topics and learn along the way. Topics include history, science, arts, technology, and entertainment.

Educators are facing increasing demands and challenges due to the current emphasis on student growth and teacher accountability. Academic or instructional coaches can work with teachers to help them develop ideas, methods, and strategies for facing and successfully conquering these challenges leading to increased student achievement. Using scenarios and scholarly resources, the book follows one coach's journey from her first day as an instructional or academic coach through her development to an experienced coach who is prepared to help new coaches. The discussion of the theoretical basis for teaching and learning provides the basis for examining various approaches to coaching, methods of data collection and analysis, the components of teacher evaluation systems, and methods for implementing these ideas into the K-12 educational setting. This book is a must read for all coaches and teacher leaders!

The current, one-size-fits-all educational model requires students to adapt to the system, but in order for students to thrive, schools must change in deep and substantial ways. This book is a catalyst for creating the kind of empowering, engaging, and effective learning environments that all students need to succeed in school and life.
