These Standard Prequalification Documents serve as a guide for those wanting to prequalify to bid on large contracts for projects financed by the World Bank. Qualifying as a bidder is separate from the bid evaluation process. Before invitations to bid on large or especially complex works projects are issued, a process of prequalification is required to select competent bidders. This document helps bidders through the prequalification process. To simplify presentation by applicants for prequalification, standard forms have been prepared for the submission of relevant information. Guidance notes and examples are provided for the implementing agency making the evaluation. Annexes give information about prequalification that are likely to be of interest to potential bidders on World Bank projects. NOTE: This replaces Standard Prequalification Document: Procurement of Works (September 1999), Stock no. 14601 (ISBN 0-8213-4601-6).

This book provides practical know-how on understanding, implementing, and managing main stream social media tools (e.g., blogs and micro-blogs, social network sites, and content communities) from a public sector perspective. Through social media, government organizations can inform citizens, promote their services, seek public views and feedback, and monitor satisfaction with the services they offer so as to improve their quality. Given the exponential growth of social media in contemporary society, it has become an essential tool for communication, content sharing, and collaboration. This growth and these tools also present an unparalleled opportunity to implement a transparent, open, and collaborative government. However, many government organization, particularly those in the developing world, are still somewhat reluctant to leverage social media, as it requires significant policy and governance changes, as well as specific know-how, skills and resources to plan, implement and manage social media tools. As a result, governments around the world ignore or mishandle the opportunities and threats presented by social media. To help policy makers and governments implement a social media driven government, this book provides guidance in developing an effective social media policy and strategy. It also addresses issues such as those related to security and privacy.

In the last few years multimedia hardware and applications have become widely available on PC and workstations. Moreover, through the tremendous development and the wide usage of the World Wide Web multimedia applications have been brought over the network to many people. This book presents the results of the fourth in a well established series of international workshops on Multimedia organized by the EUROGRAPHICS Association, and held from May 28 to 30, 1996, in Rostock, Germany. The workshop had the special topic Multimedia on the Net and was the follow up of the EUROGRAPHICS Symposium and Workshop on Multimedia held in Graz in June 1994. The workshop program consisted of an invited keynote speech and five technical sessions. The fifteen contributions selected for this volume treat topics of particular interest in current research and address actual problems of the use of multimedia in distributed applications over the network. According to the technical sessions they can be roughly structured in the parts concepts for handling multimedia data, still and motion pictures on the net, WWW and multimedia, collaborative multimedia, and multimedia and education. Concepts for handling multimedia data are addressed in two contributions. The first treats a frame based presentation model for distributed information systems (Kirste), the other one presents a temporal logic formalism for specifying navigational transformation in hypermedia applications (Mere et al.).

The 2019 edition of *Policy Coherence for Sustainable Development* looks at countries' efforts to meet this challenge and identifies opportunities for accelerating progress. The third in a series, it shows how integrated and coherent policies, supported by strong institutional and governance mechanisms, can contribute to empowering people and ensuring inclusiveness and equality.
