CHAPTER 6 – OPERATION OF THE WHEEL BALANCER Do not use the machine until you have read and understood the entire manual and the warning provided. The wheel guard must not be opened before the wheel stops. The STOP button serves to stop the machine immediately in emergencies. Page 13 On most wheels, the inner side of the wheel hub usually has the most uniform surface for wheel balancing. Always center the wheel by the most uniform shaped side of the hub to achieve the most accurate balance.
