All hell breaks loose in Northern Mississippi when the daughter of degenerate sharecroppers runs away from home and lights out across the state with two dollars and a pack of cigarettes to her name.

What makes a good story or a screenplay great? The vast majority of writers begin the storytelling process with only a partial understanding where to begin. Some labor their entire lives without ever learning that successful stories are as dependent upon good engineering as they are artistry. But the truth is, unless you are master of the form, function and criteria of successful storytelling, sitting down and pounding out a first draft without planning is an ineffective way to begin. Story Engineering starts with the criteria and the architecture of storytelling, the engineering and design of a story—and uses it as the basis for narrative. The greatest potential of any story is found in the way six specific aspects of storytelling combine and empower each other on the page. When rendered artfully, they become a sum in excess of their parts. You'll learn to wrap your head around the big pictures of storytelling at a professional level through a new approach that shows how to combine these six core competencies which include: • Four elemental competencies of concept, character, theme, and story structure (plot) • Two executorial competencies of scene construction and writing voice The true magic of storytelling happens when these six core competencies work together in perfect harmony. And the best part? Anyone can do it!

Traces the career of the American author, discussing his troubled Mississippi childhood, his unconventional apprenticeship to becoming a writer, and the success on a national level that he achieved before his early death.

One of the most common questions new writers ask professionals is how they wrote their book—what was their process for storytelling? Did they use an outline to plan the book, or write it from the seat of their pants? But really the question should be about the general principles and nature of storycraft—does every part of a story have what it needs to keep readers turning the pages? Bestselling author and creator of StoryFix.com Larry Brooks changes the sound of the writing conversation by introducing a series of detailed criteria for novelists of every level and genre to refer to while writing, regardless of their preferred writing method. Beginning with the broadest part of the story, the early checklists help writers to ensure that their novel is based on a premise rather than an idea, and gradually hones in on other elements to keep the story moving forward including: • dramatic tension • narrative strategy • scene construction Readers won't know or care about the process. But what Brooks offers here is a chance for readers to make the most of whichever process they choose, and in doing so cut years off their learning curve.

" —The Washington Post Book World Now a major motion picture starring Nicolas Cage, directed by David Gordon Green. When their paths cross, Joe offers him a chance just as his own chances have dwindled to almost nothing. Together they follow a twisting map to redemption—or ruin.

The prize-winning biography of the celebrated author of the Alexandria Quartet and the Avignon Quintet: an " elegant and meticulous . . . treat " (Kirkus Reviews). A New York Times Notable Book Born in colonial India in 1912, Lawrence Durrell established his literary reputation as a citizen of the Mediterranean. After attending school in England, Durrell escaped the country he dubbed " Pudding Island " for the Greek island of Corfu, only to make another escape—this time from Nazi invasion—to Egypt. His experiences in wartime Alexandria led to a quartet of novels, beginning with Justine, that are collectively considered some of the great masterpieces of postwar fiction. Durrell ' s peripatetic life, which eventually took him to the South of France, fed his work with the richness and drama of his various adoptive homes. A man of protean talents, Durrell is celebrated for his fiction and poetry, as well as his highly regarded translations, essays, and travel literature. In researching this authorized biography, Ian S. MacNiven traveled over a period of twenty years from India to California, interviewing hundreds of individuals and visiting all but one of the many places Durrell lived. The result is an intimate portrait of a literary titan that was awarded a prize by the French city of Antibes for the year ' s best study on Durrell.
